| Comment.  belong to the Rear Services of the GSFG and possibly came from the Adolf Hitler Kaserne (2287) in Potsdam. If the assumption that the transfer of the unit mentioned in paragraph 2 is connected with the entraining is correct, a signal unit of the GSFG possibly transferred from Potsdam to Leipzir-Wiederitzsch.  Comment 1. The kaserne was possibly vacated for reoccupation by an air force unit. Except for Lieutenant Colonel (?) Zevakin (fnu), all officers mentioned are reported for the first time.  Comment. Previous reports indicate that the train is probably identical with a train which carried artillery pieces from Potsdam to Schwerin on 24 November 1954. The 34th Arty Dlv possibly turned over artillery pieces to the IX Mtz Rifle orps in Schwerin. On 18 November 1954, the division received 35 gun howitzers of 152 mm from the USSR. The number of the prime mover possibly belongs to the 4th Gds Arty Brig of the corps which was probably the consignee. No definite conclusions can be drawn about how many artillery pieces of various type and caliber arrived at the GDR from the USSR and how many artillery units were newly equipped.  Comment.   |
| belong to the Rear Services of the GSFG and possibly came from the Adolf Hitler Kaserne (2287) in Potsdam. If the assumption that the transfer of the unit mentioned in paragraph 2 is connected with the entraining is correct, a signal unit of the GSFG possibly transferred from Fotsdam to Leipzir-Wiederitzsch.  Comment.  For information on the transfer of this unit, see  Comment 1. The kaserne was possibly vacated for reoccupation by an air force unit. Except for Lieutenant Colonel (?) Zevakin (fnu), all officers mentioned are reported for the first time.  Comment.  Previous reports indicate that the train is probably identical with a train which carried artillery pieces from Potsdam to Schwerin on 24 November 1954. The 34th Arty Div possibly turned over artillery pieces to the IX Mtz Rifle orps in Schwerin. On 18 November 1954, the division received 35 gun howitzers of 152 mm from the USSR.  The number of the prime mover possibly the consignee. No definite conclusions can be drawn about how many artillery pieces of various type and caliber arrived at the GDR from the USSR and how many artillery units were newly equipped.  Comment.  Comment.  The artillery pieces either were consigned to the 2d Light Arty Brig 1st Mecz Div. The shipments probably belong to the reequipment commented on in Comment 3.   |
